

Do-It-Yourself No-Sew Pet Bed

Materials:

- 2 yards of fleece fabric
- Scissors
- Ruler

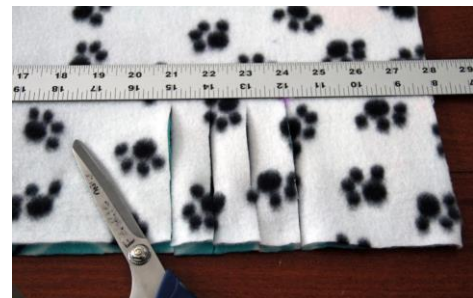

Step 1:

Whether you're making a dog bed or cat beds, start with 2 yards of fleece fabric. Cut your fabric in half, so you have two panels that each measure about 58x36 inches. Lay them evenly on top of each other.

If you are making a **Dog Bed**: You're all set! Two yards of fabric will yield one dog bed.

If you are making a **Cat Bed**: With your two panels evenly stacked, cut them in half. Now, you should have two sets of 2-ply fleece, each measuring about 29x18 inches. Note that the dimensions for one dog bed yields two cat beds!

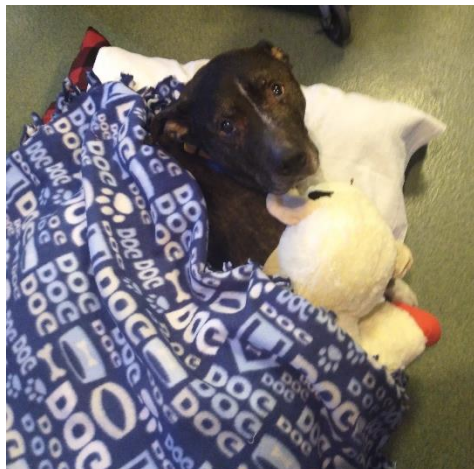

Step 2

Cut 1 inch wide strips around the whole perimeter of the layered fabric panels (the cuts should go about 2 inches in, long enough to tie easily). Cut both layers at once so they line up.

Step 3

Take one strip from the top layer and tie it to the corresponding strip beneath. Double knot each strip so they are secure and cannot be pulled apart.

Step 4

Tie the knots for all four edges. Once all sides have been knotted, you are done. Your new snuggly blanket is ready to be enjoyed by a cat or dog!
